EVOLUTION

INTERNATIONAL JOURNAL OF ORGANIC EVOLUTION

PUBLISHED BY

THE SOCIETY FOR THE STUDY OF EVOLUTION

Vol. 53 **Subject Index** **1999**

Evolution, 53(6), 1999, pp. 2019–2028

AMPHIBIANS

Amphibia, hybrid zone, natural selection, reproductive isolation, speciation, 1611

Amphibian, endogenous selection, exogenous selection, fitness components, hybridization, larvae, *Rana*, 1872

ANNELIDS

Alvinellid polychaetes, deep-sea hydrothermal vents, dispersal, gene flow, metapopulation, simulations, 1128

Arctonoe, free-spawning, gamete compatibility, gamete interactions, polychaetes, reproductive isolation, speciation, 435

ARACHNIDS

Acari, arrhenotoky, genetic systems, haplodiploidy, molecular systematics, phylogenetics, pseudoarrhenotoky, 1796

Allometry, Araneae, body size, clutch size, comparative analysis, female reproductive output, life history, phylogeny, sexual dimorphism, spiders, 1987

ARTHROPODS

Animal phyla, Annelida, Arthropoda, Cambrian radiation, Cnidaria, invertebrate phylogeny, Mollusca, 319

Crayfish, dispersal, *Orconectes*, phylogeny, vicariance biogeography, zoogeography, 123

BACTERIA

Adaptation, bacteria, *Escherichia coli*, fitness, mutation, niche, temperature, thermotolerance, 386

Bacteria, cost of resistance, epistasis, resistance, viruses, 292

BIOGEOGRAPHY

Allozymes, *Chondrilla*, cosmopolitanism, endemism, population structure, taxonomy, 1414

AMOVA, *Dendroica*, geographic variation, mtDNA, phylogeography, population differentiation, 1915

Anthus, dispersal, historical biogeography, molecular clock, vicariance, 1536

Arctic, biogeography, *Daphnia*, glacial refugia, long-distance dispersal, mtDNA RFLPs, phylogeography, vicariance, 777

Aves, biogeography, coalescent, control region, gene flow, mtDNA, phylogeography, *Strix occidentalis*, 919

Biogeographic, centrifugal speciation, East Indies, evolutionary center, marine tropics, 326

Biogeography, *Campeloma*, mtDNA sequence variation, parthenogenesis, sexual reproduction, 1769

Biogeography, control region, glacial refugium, intron, ITS1, phylogeography, Pleistocene, rock ptarmigan, 1936

Biogeography, cytochrome oxidase, gene flow, islands, mitochondrial DNA, ocean currents, sea urchins, 806

Biogeography, *Drosophila*, mtDNA, ND5, phylogeny, rainforest, selection, 1306

Biogeography, hermaphrodite, outcrossing, phenotypic plasticity, phylogeny, *Rivulus marmoratus*, selfing, 1217

Bottlenecks, Chrysomelidae, coalescence, historical demography, *Ophraella*, phylogeography, phytophagous insects, speciation, 1846

Crayfish, dispersal, *Orconectes*, phylogeny, vicariance biogeography, zoogeography, 123

Cytochrome *b*, glacial refugia, Haida Gwaii, mammals, *Martes*, phylogeography, *Sorex*, 2008

Cytochrome *b*, glacial refugia, Queen Charlotte Islands, *Ursus americanus*, 2013

Cytochrome oxidase I, dispersal, freshwater colonization, habitat transition, phylogeography, range expansion, salinity tolerance, 1423

Cytochrome oxidase I and II, geographic structure, parasitoid-host interactions, phylogeography, population differentiation, 818

Geographic variation, hybrid zones, microsatellites, migration, migratory divide, mitochondrial DNA, morphology, orientation, 1925

BIRDS

Adaptive radiation, control region, Darwin's finches, *Geospiza*, hybridization, ITS 1, phylogeny, 1553

Aerobic capacity, evolutionary physiology, high altitude, *Peromyscus maniculatus*, selection, summit metabolism, thermogenic capacity, 1280

Age, cooperative breeding, DNA fingerprinting, extrapair paternity, *Malurus cyaneus*, molt, sexual selection, 938

AMOVA, *Dendroica*, geographic variation, mtDNA, phylogeography, population differentiation, 1915

Anthus, dispersal, historical biogeography, molecular clock, vicariance, 1536

Auklet, phylogeny, polytomy, sample size, speciation, statistical power analysis, 932

Aves, biogeography, coalescent, control region, gene flow, mtDNA, phylogeography, *Strix occidentalis*, 919

Biogeography, control region, glacial refugium, intron, ITS1, phylogeography, Pleistocene, rock ptarmigan, 1936

Bootstrap, Columbiformes, developmental control genes, Fringillidae, *Hox* genes, Mantel's test, morphometrics, phenotypic correlation matrices, skeletal measurements, 899

Brood parasitism, *Clamator glandarius*, coevolution, gene flow, host defense, *Pica pica*, 947

Collared flycatcher, genetic benefit, genotype-by-environment interactions, heritability, natal environment, sexual selection, 1564

Condition, egg size, *Ficedula hypoleuca*, heritability, life-history traits, maternal effects, ontogeny, 279

Ficedula hypoleuca, mate choice, pied flycatcher, plumage color, population divergence, secondary sexual characters, sexual selection, signals, speciation, 1235

BOOK REVIEWS

Allozymes again, a review of *Selection in Natural Populations*, by John Brookfield, 632

Fine tuning the peppered moth paradigm, a review of *Melanism: Evolution in Action*, by Bruce S. Grant, 980

Four little books about evolution, a review of *Neanderthals, Bandits and Farmers: How Agriculture Really Began*; *Shaping Life: Genes, Embryos and Evolution*; *Divided Labours: An Evolutionary View of Women at Work*; and *The Truth about Cinderella: A Darwinian View of Parental Love*, by Deborah Charlesworth, 985

Quantitative genetics, a review of *Genetics and Analysis of Quantitative Traits*, by Trudy F. C. Mackay, 307

Teaching neo-Darwinism: weak selection among three evolution texts, a review of *Evolution, Evolutionary Analysis*, and *Evolutionary Biology*, by William S. Moore, 635

© 1999 The Society for the Study of Evolution. All rights reserved.

CNIDARIA

Allorecognition, genetic polymorphism, *Hydractinia symbiolongicarpus*, Hydrozoa, population structure, RAPDs, 793

Animal phyla, Annelida, Arthropoda, Cambrian radiation, Cnidaria, invertebrate phylogeny, Mollusca, 319

COALESCENCE

Aves, biogeography, coalescent, control region, gene flow, mtDNA, phylogeography, *Strix occidentalis*, 919

COEVOLUTION

Agavaceae, breeding structure, correlated mating, mutualism, paternity analysis, *Tegeticula yuccasella*, *Yucca filamentosa*, yucca moth, 1293

Allozymes, apple maggot fly, directional selection, fruit rot, host races, negative genetic fitness trade-offs, sympatric speciation, 187

Bombus diversus, *Campanula punctata*, corolla width, male reproductive success, pollen fall, pollen removal, 752

Brood parasitism, *Clamator glandarius*, coevolution, gene flow, host defense, *Pica pica*, 947

Brood parasitism, coevolution, gene flow, host-parasite interactions, migration, 269

Chase-away, evolutionary conflict, interlocus contest evolution, intersexual coevolution, sexual selection, 302

Coadaptation, copepod, cytochrome *c* oxidase, enzyme activity, introgression, nuclear-cytoplasmic interactions, *Tigriopus californicus*, 1972

Coevolution, evolution of resistance, herbivore, parasitoid, pea aphid, population structure, tritrophic interactions, 1435

Coevolution, garter snake, preadaptation, predator-prey, resistance, tetrodotoxin, 1528

Coevolution, garter snake, resistance, tetrodotoxin, toxicity, 626

COMPETITION

Competition, female choice, *Gryllus bimaculatus*, heritability, mating, sexual selection, trade-off, 620

CONSERVATION BIOLOGY

Allozyme heterozygosity, conservation biology, islands, parasitism, *Peromyscus maniculatus*, population density, 1318

Endangered species, isozymes, linkage disequilibrium, outcrossing, rarity, 91

CRUSTACEANS

Body size, *Cancer* crabs, ecomorphological adaptation, evolutionary contrasts, habitat shift, 961

Conchostraca, heterozygosity, overdominance model, partial-dominance model, self-fertilization, 472

DEVELOPMENT

Bootstrap, Columbiformes, developmental control genes, Fringillidae, *Hox* genes, Mantel's test, morphometrics, phenotypic correlation matrices, skeletal measurements, 899

Development, diffusion–threshold model, dominance, epistasis, fluctuating asymmetry, heritability, quantitative genetics, 358

Generative mechanisms, heterochrony, heterotopy, homology, Mollusca, ontogenetic trajectory, Patellogastropoda, relative warps analysis, 447

DEVELOPMENTAL STABILITY

Annona cherimola, developmental stability, fluctuating asymmetry, heritability, heterozygosity, phenotypic quality, plant plasticity, 1396

Combined stress, developmental stability, *Drosophila melanogaster*, extreme phenotypes, fluctuating asymmetry, heritability, phenotypic variability, 493

Developmental instability, environmental stress, fluctuating asymmetry, genomic coadaptation, heterozygosity, hybridization, *Salix*, 408

Developmental instability, *Forficula auricularia*, sexual selection, 157

Developmental stability, directional asymmetry, fluctuating asymmetry, mate choice, size, weight, 527

DROSOPHILA

Acclimation, *Drosophila*, experimental evolution, heat-shock proteins, Hsp70, thermotolerance, 484

Adh, *αGpdh*, density-dependent mortality, *Drosophila melanogaster*, genotype-by-environment interaction, inversions, Levene's model, natural population, protected polymorphism, 175

Alcohol dehydrogenase, frequency-dependent selection, olive fruit fly, 518

Antagonistic pleiotropy, cadmium resistance, *Drosophila melanogaster*, fitness costs, life histories, metallothionein, trade-offs, 826

Asobara tabida, competition, *Drosophila melanogaster*, feeding rate, *Leptopilina boulardi*, parasitoid, resistance, trade-offs, 1302

Asobara tabida, correlated responses, *Drosophila melanogaster*, encapsulation, Leptopilina, parasitoids, temperature, 966

Behavioral isolation, cytoplasmic incompatibility, *Drosophila*, gene flow, Haldane's rule, mtDNA, nucleotide diversity, reproductive isolation, speciation, *Wolbachia*, 1157

Biogeography, *Drosophila*, mtDNA, ND5, phylogeny, rainforest, selection, 1306

Body size, *Drosophila*, inversion polymorphism, longevity, 612

Bottleneck, *Drosophila*, founder-flush, genetic transilience, speciation, 1632

Combined stress, developmental stability, *Drosophila melanogaster*, extreme phenotypes, fluctuating asymmetry, heritability, phenotypic variability, 493

Drosophila, experimental science, genetic transilience, speciation, 1628

Drosophila melanogaster, inbreeding, peak shifts, phenotypic variance, wing traits, 1143

Drosophila quinaria, genetic arms race, population genetics, segregation distortion, selfish genes, X-chromosome polymorphism, Y-chromosome polymorphism, 164

Drosophila serrata, evolutionary hypotheses, field heritability, genetic variation, species borders, stress resistance, 1823

Drosophila simulans, experimental populations, meiotic drive, sex-ratio distortion, 506

ECHINODERMS

Acanthaster, allozymes, crown-of-thorns, echinoderms, gene flow, Indo-Pacific, marine, population genetics, speciation, 1782

Biogeography, cytochrome oxidase, gene flow, islands, mitochondrial DNA, ocean currents, sea urchins, 806

ECOLOGY

Aphids, ecological specialization, habitat choice, insect-plant interactions, reproductive isolation, speciation, 1446

Body size, *Cancer* crabs, ecomorphological adaptation, evolutionary contrasts, habitat shift, 961

Density regulation, evolutionarily stable strategy, hard selection, polymorphism, reaction norm, soft selection, unpredictable environment, 1329

Density-dependence, iteroparity, reproductive effort, semelparity, stochastic environments, 677

Family structure, genetic relatedness, growth form, krummholz, subalpine, treeline, 74

ELECTROPHORESIS

Adenophora grandiflora, allozymes, endemic species, genetic structure, protandry, spatial autocorrelation, 1068

Allozymes, *Chondrilla*, cosmopolitanism, endemism, population structure, taxonomy, 1414

Allozymes, cosmopolitan mushrooms, gene flow, mating alleles, 1665

EPISTASIS

Additive genetic variance, epistasis, founder-effect speciation, mice, population bottlenecks, 1009

Bacteria, cost of resistance, epistasis, resistance, viruses, 292

Development, diffusion–threshold model, dominance, epistasis, fluctuating asymmetry, heritability, quantitative genetics, 358

EVOLUTION

Darwins, evolutionary rates, haldanes, microevolution, population divergence, rapid evolution, 1637

Density regulation, evolutionarily stable strategy, hard selection,

polymorphism, reaction norm, soft selection, unpredictable environment, 1329
Evolutionary trajectory, genetic constraints, genetic correlation, genetic covariance, multivariate evolution, quantitative genetics, 1592

Extinction
Coregonus, ecotypes, *Gasterosteus*, microsatellite, morphology, reproductive isolation, speciation, sympatry, 1491

Fishes
Adaptive radiation, hybrid fitness, natural selection, reproductive isolation, speciation, stickleback, 866
Allozyme, billfish, blue marlin, comparative molecular evolution, genetic drift, Istiophoridae, *Makaira nigricans*, mitochondrial DNA, population genetics, single-copy nuclear DNA, 568
Ambystoma barbouri, background matching, gene flow, local adaptation, pigment polymorphism, predation, 889
Atlantic salmon, genetic differentiation, microsatellites, scale samples, temporal variation, 261
Biogeography, hermaphrodite, outcrossing, phenotypic plasticity, phylogeny, *Rivulus marmoratus*, selfing, 1217
Compensatory growth, fecundity, growth, optimality, salmon, selection, survival, 1605
Coregonus, genetic differentiation, microsatellites, morphology, species flock, trophic ecology, 1857
Fishes, genus *Gila*, geologic history, hydrography, Mantel test, vicariance, western North America, 238
Gasterosteus, hybrid fitness, mating discrimination, reproductive isolation, sexual selection, speciation, 874
Hybrid zones, marine fishes, mate choice, mitochondrial control-region, 247
Mate choice, olfactory cues, phylogeny, swordtail fishes, *Xiphophorus*, 880

Fitness
Adaptation, bacteria, *Escherichia coli*, fitness, mutation, niche, temperature, thermotolerance, 386
Colicin resistance, colicins, fitness effects, pleiotropy, 1019

Fungi
Allozymes, cosmopolitan mushrooms, gene flow, mating alleles, 1665
Clones, DNA fingerprints, homoplasy, IGS, microsatellites, minisatellites, recombination, *Sclerotinia sclerotiorum*, 11
Environmental stress, genetic load, *Saccharomyces cerevisiae*, spontaneous mutations, 1966

Gastropods
Adaptive radiation, Bonin Islands, island biology, land snails, *Mandarina*, molecular evolution, mtDNA, 460
Balancing selection, habitat variation, *Mpi*, multiple locus comparisons, *Semibalanus balanoides*, 135
Bathymetric clines, benthic, body size, deep sea, gastropods, 1298

Gene Flow
Allozymes, cosmopolitan mushrooms, gene flow, mating alleles, 1665
Assortative mating, clinal hybrid zone, gene flow, mosaic hybrid zone, reinforcement, stepping-stone model, 1343
Brood parasitism, coevolution, gene flow, host-parasite interactions, migration, 269
Colonization, gene flow, plant population genetics, pollen dispersal, *Silene alba*, 63
Dispersal experiments, functional estimation, gene-flow patterns, pollen dispersal, 2002
Elaphe obsoleta, gene flow, hibernacula, microsatellites, population structure, snakes, 1995

Genetic Drift
Correlations, *Crotaphytus collaris*, F-statistics, gene flow, genetic distance, Mantel's test, population structure, random genetic drift, 1898
Geographic invariance, infinite-alleles model, infinite-sites model, population differentiation, population structure, 664
McDonald-Kreitman test, mildly deleterious mutation, neutrality index, Tajima's *D*, 1617

Herbivory
Adaptive plasticity, compensation, herbivory, induced defense, male plant fitness, overcompensation, plant-insect interactions, *Raphanus raphanistrum*, 1093
Allocation costs, *Brassica rapa*, costs of resistance, ecological costs, herbivores, myrosinase, pollinators, 1105
Cost of resistance, *Datura wrightii*, herbivory, polymorphism, selection, trichomes, 22

Heritability
Competition, female choice, *Gryllus bimaculatus*, heritability, mating, sexual selection, trade-off, 620
Genetic correlation, genetic covariance, genetic variance, heritability, quantitative genetics, 216

Hybridization
Adaptive radiation, control region, Darwin's finches, *Geospiza*, hybridization, ITS 1, phylogeny, 1553
Adaptive radiation, hybrid fitness, natural selection, reproductive isolation, speciation, stickleback, 866
Amphibian, endogenous selection, exogenous selection, fitness components, hybridization, larvae, *Rana*, 1872
Arenaria, hybridization, mating system evolution, reproductive character displacement, self-pollination, 1723
Assortative mating, clinal hybrid zone, gene flow, mosaic hybrid zone, reinforcement, stepping-stone model, 1343
Character size, chromosomal evolution, developmental stability, fluctuating asymmetry, house mouse, hybridization, Robertsonian fusion, 1268
cpDNA, hybridization, introgression, mtDNA, *Quercus*, species co-occurrence, white oaks, 1406
Flour beetles, genotype-by-environment interaction, Haldane's rule, hybrid inviability, morphology, norms of reaction, speciation, temperature, *Tribolium*, 855
Geographic variation, hybrid zones, microsatellites, migration, migratory divide, mitochondrial DNA, morphology, orientation, 1925
Hybrid zone, hybridization, introgression, morphological variation, RAPDs, 1037
Hybrid zones, marine fishes, mate choice, mitochondrial control-region, 247

Inbreeding
Abies procera, Douglas-fir, inbreeding depression, noble fir, photomorphogenic effects, *Pinus ponderosa*, ponderosa pine, *Pseudotsuga menziesii*, 417
Additive genetic variance, epistasis, founder-effect speciation, mice, population bottlenecks, 1009
Arabis petraea, Bayesian methods, inbreeding depression, 1354
Arenaria, hybridization, mating system evolution, reproductive character displacement, self-pollination, 1723
Bottleneck, *Drosophila*, founder-flush, genetic transilience, speciation, 1632
Bottlenecks, Chrysomelidae, coalescence, historical demography, *Ophraella*, phylogeography, phytophagous insects, speciation, 1846
Bottlenecks, differentiation, genetic distance, microsatellites, statistical significance, 313
Character evolution, convergence, *Linanthus*, Polemoniaceae, self-incompatibility, selfing, 1387
Chrysomelidae, host shifts, inbreeding, *Ophraella*, phytophagous insects, shifting balance theory, variance-induced peak shifts, 561
Colonization, gynodioecy, inbreeding depression, pollen limitation, *Silene vulgaris*, 745
Conchostraca, heterozygosity, overdominance model, partial-dominance model, self-fertilization, 472
Correlated characters, genetic covariances, selection gradients, self-fertilization, 350
Deleterious alleles, inbreeding depression, purging, recessive mutations, selective interference, self-fertilization, size-specific mortality, 758

Deleterious mutation, fitness, mutation, mutation rate, mutational effect, 645
Deleterious mutations, genetic load, inbreeding depression, *Mimulus*, outcrossing, self-fertilization, 1678
Directional dominance, dominance variance, inbreeding depression, 1288
Drosophila melanogaster, inbreeding, peak shifts, phenotypic variance, wing traits, 1143
Effective population size, habitat quality, inbreeding coefficient, interdemic model, island model, metapopulation, 1
Environmental stress, genetic load, *Saccharomyces cerevisiae*, spontaneous mutations, 1966
Genetic variation, inbreeding depression, microsatellite, parasite resistance, pathogen, survival, susceptibility, 1259
Herkogamy, inbreeding depression, *Ipomoea purpurea*, mating system, 1366
Heterosis, inbreeding depression, juvenile survival, mean d^2, population history, red deer, 1951
Quantitative genetics, selection response, self-fertilization, 336

INSECTS. SEE ALSO *DROSOPHILA*
Adaptation, arginine kinase, *Enallagma*, enzyme activity, metabolism, Odonata, 1835
Allozymes, apple maggot fly, directional selection, fruit rot, host races, negative genetic fitness trade-offs, sympatric speciation, 187
Annualism, Aplocheiloidei, evolution of diapause, molecular phylogeny, mtDNA, PCR, rapid radiation, Rivulidae, vicariant speciation, 1200
Ant lion, Bergmann's rule, body size, common garden, countergradient selection, latitude, reciprocal transplant, 1180
Ants, assortative mating, body size and shape, *Pogonomyrmex*, sexual selection, 535
Ants, *Pheidole*, queen-worker conflict, sex ratio, 1470
Aphidiinae, asexual, elongation factor, *Lysiphlebus*, mitochondrial DNA, parthenogenesis, phylogeny, thelytoky, 1189
Auditory sensitivity, courtship role-reversal, mate-feeding, sexual selection, Tettigoniidae, 546
Bactrocera cucurbitae, circadian rhythm, genetic correlation, mating behavior, reproductive isolation, speciation, 201
Bombus diversus, *Campanula punctata*, corolla width, male reproductive success, pollen fall, pollen removal, 752
Bombus terrestris, *Crithidia bombi*, horizontal transmission, host genotype, parasite fitness, Trypanosomatidae, 426
Bruchidae, geographic variation, life cycle, natural selection, phenotypic plasticity, reaction norm, 1979
Caste, character ordination, haplodiploidy, Hymenoptera, Vespidae, 225
Chrysomelidae, host shifts, inbreeding, *Ophraella*, phytophagous insects, shifting balance theory, variance-induced peak shifts, 561
Chrysoperla, Chrysopidae, evolution, homoplasy, insect, mtDNA, Neuroptera, phylogeny, songs, speciation, systematics, 1165
Competition, female choice, *Gryllus bimaculatus*, heritability, mating, sexual selection, trade-off, 620
Crickets, genetic correlation, *Gryllus*, heritability, sexual selection, 848
Crickets, *Gryllus firmus*, JH, JHE, juvenile hormone, juvenile hormone esterase, wing polymorphism, 837
Developmental instability, *Forficula auricularia*, sexual selection, 157
Flour beetles, genotype-by-environment interaction, Haldane's rule, hybrid inviability, morphology, norms of reaction, speciation, temperature, *Tribolium*, 855
Fluctuating asymmetry, *Harmonia axyridis*, ladybird beetle, life-history traits, phenotypic engineering, plasticity, statistical selection, 1312
Genetic correlation, heritability, juvenile hormone, juvenile hormone esterase, liability, threshold model, wing polymorphism, 973
Genetic correlation, insect, juvenile hormone, quantitative genetics, wing dimorphism, 977
Insect flight, natural selection, phenotypic manipulation, pierid butterflies, survival analysis, wing size, 1479

LIFE HISTORY
Acacia greggii, *Cercidium floridum*, genetic correlation, heritability, parental investment, phenotypic plasticity, *Stator limbatus*, 552
Aging, habitat duration, life history, reproductive value, senescence, trade-off, 1744
Allocation, density-dependent character correlations, environmental heterogeneity, genetic correlations, phytochrome, red: far red, trade-offs, 1377
Allocation costs, *Brassica rapa*, costs of resistance, ecological costs, herbivores, myrosinase, pollinators, 1105
Allometry, Araneae, body size, clutch size, comparative analysis, female reproductive output, life history, phylogeny, sexual dimorphism, spiders, 1987
Annualism, Aplocheiloidei, evolution of diapause, molecular phylogeny, mtDNA, PCR, rapid radiation, Rivulidae, vicariant speciation, 1200
Ant lion, Bergmann's rule, body size, common garden, countergradient selection, latitude, reciprocal transplant, 1180
Antagonistic pleiotropy, cadmium resistance, *Drosophila melanogaster*, fitness costs, life histories, metallothionein, trade-offs, 826
Body size, *Drosophila*, inversion polymorphism, longevity, 612
Compensatory growth, fecundity, growth, optimality, salmon, selection, survival, 1605
Condition, egg size, *Ficedula hypoleuca*, heritability, life-history traits, maternal effects, ontogeny, 279
Cost of reproduction, egg limitation, life-history trade-offs, oviposition, parasitoids, sex allocation, 376
Daphnia pulex, genetic architecture, life-history evolution, microsatellite loci, mitochondrial DNA, quantitative genetics, 100
Density-dependence, iteroparity, reproductive effort, semelparity, stochastic environments, 677
Fluctuating asymmetry, *Harmonia axyridis*, ladybird beetle, life-history traits, phenotypic engineering, plasticity, statistical selection, 1312

LIZARDS
Adaptive radiation, *Anolis*, disparity, diversity, lizard, PCA, *Sceloporus*, 1226
Correlations, *Crotaphytus collaris*, F-statistics, gene flow, genetic distance, Mantel's test, population structure, random genetic drift, 1898
Energetics, exercise, integrative biology, lizard, locomotion, optimality, physiology, 580

MAMMALS
Additive genetic variance, epistasis, founder-effect speciation, mice, population bottlenecks, 1009
Aerobic capacity, evolutionary physiology, high altitude, *Peromyscus maniculatus*, selection, summit metabolism, thermogenic capacity, 1280
Allozyme heterozygosity, conservation biology, islands, parasitism, *Peromyscus maniculatus*, population density, 1318
Bottleneck, control region, mitochondrial DNA, ND1, *Nyctalus noctula*, Pleistocene, population structure, 1247
California Channel Islands, discriminant function analysis, morphological change, morphometrics, *Peromyscus maniculatus*, temporal variation, 1573
Character size, chromosomal evolution, developmental stability, fluctuating asymmetry, house mouse, hybridization, Robertsonian fusion, 1268
Chiroptera, gene flow, microsatellites, mitochondrial DNA, population structure, 1582
Cytochrome *b*, glacial refugia, Haida Gwaii, mammals, *Martes*, phylogeography, *Sorex*, 2008
Cytochrome *b*, glacial refugia, Queen Charlotte Islands, *Ursus americanus*, 2013
Heterosis, inbreeding depression, juvenile survival, mean d^2, population history, red deer, 1951

Maternal Effect

Condition, egg size, *Ficedula hypoleuca,* heritability, life-history traits, maternal effects, ontogeny, 279

Mitochondrial DNA

Adaptive radiation, Bonin Islands, island biology, land snails, *Mandarina,* molecular evolution, mtDNA, 460

Allozymes, cpDNA, F_{ST}, introgression, mtDNA, *Pinus ponderosa,* population structure, 769

AMOVA, *Dendroica,* geographic variation, mtDNA, phylogeography, population differentiation, 1915

Annualism, Aplocheiloidei, evolution of diapause, molecular phylogeny, mtDNA, PCR, rapid radiation, Rivulidae, vicariant speciation, 1200

Aphidiinae, asexual, elongation factor, *Lysiphlebus,* mitochondrial DNA, parthenogenesis, phylogeny, thelytoky, 1189

Arctic, biogeography, *Daphnia,* glacial refugia, long-distance dispersal, mtDNA RFLPs, phylogeography, vicariance, 777

Aves, biogeography, coalescent, control region, gene flow, mtDNA, phylogeography, *Strix occidentalis,* 919

Behavioral isolation, cytoplasmic incompatibility, *Drosophila,* gene flow, Haldane's rule, mtDNA, nucleotide diversity, reproductive isolation, speciation, *Wolbachia,* 1157

Biogeography, cytochrome oxidase, gene flow, islands, mitochondrial DNA, ocean currents, sea urchins, 806

Biogeography, *Drosophila,* mtDNA, ND5, phylogeny, rainforest, selection, 1306

Bottleneck, control region, mitochondrial DNA, ND1, *Nyctalus noctula,* Pleistocene, population structure, 1247

Chiroptera, gene flow, microsatellites, mitochondrial DNA, population structure, 1582

Chrysoperla, Chrysopidae, evolution, homoplasy, insect, mtDNA, Neuroptera, phylogeny, songs, speciation, systematics, 1165

cpDNA, hybridization, introgression, mtDNA, *Quercus,* species co-occurrence, white oaks, 1406

Daphnia pulex, genetic architecture, life-history evolution, microsatellite loci, mitochondrial DNA, quantitative genetics, 100

Database, GenBank, geographic variation, mitochondrial DNA, 1961

Geographic variation, hybrid zones, microsatellites, migration, migratory divide, mitochondrial DNA, morphology, orientation, 1925

Geographic variation, mtDNA, phylogeny, sexual selection, speciation, species concepts, 1884

Hybrid zones, marine fishes, mate choice, mitochondrial control-region, 247

Molecular Evolution

Acclimation, *Drosophila,* experimental evolution, heat-shock proteins, Hsp70, thermotolerance, 484

Adaptation, arginine kinase, *Enallagma,* enzyme activity, metabolism, Odonata, 1835

Adh, αGpdh, density-dependent mortality, *Drosophila melanogaster,* genotype-by-environment interaction, inversions, Levene's model, natural population, protected polymorphism, 175

Age, cooperative breeding, DNA fingerprinting, extrapair paternity, *Malurus cyaneus,* molt, sexual selection, 938

Alcohol dehydrogenase, frequency-dependent selection, olive fruit fly, 518

Allorecognition, genetic polymorphism, *Hydractinia symbiolongicarpus,* Hydrozoa, population structure, RAPDs, 793

Allozyme, billfish, blue marlin, comparative molecular evolution, genetic drift, Istiophoridae, *Makaira nigricans,* mitochondrial DNA, population genetics, single-copy nuclear DNA, 568

Allozymes, aridity, chloroplast DNA, gene flow, hybridization, population structure, *Senecio,* 36

Allozymes, cpDNA, F_{ST}, introgression, mtDNA, *Pinus ponderosa,* population structure, 769

Anthus, dispersal, historical biogeography, molecular clock, vicariance, 1536

Atlantic salmon, genetic differentiation, microsatellites, scale samples, temporal variation, 261

Balancing selection, habitat variation, *Mpi,* multiple locus comparisons, *Semibalanus balanoides,* 135

Biogeography, control region, glacial refugium, intron, ITS1, phylogeography, Pleistocene, rock ptarmigan, 1936

Bottlenecks, differentiation, genetic distance, microsatellites, statistical significance, 313

Clarkia gracilis, gene silencing, phosphoglucose isomerase, polyploidy, 1060

Clones, DNA fingerprints, homoplasy, IGS, microsatellites, minisatellites, recombination, *Sclerotinia sclerotiorum,* 11

Coadaptation, copepod, cytochrome *c* oxidase, enzyme activity, introgression, nuclear-cytoplasmic interactions, *Tigriopus californicus,* 1972

Coregonus, ecotypes, *Gasterosteus,* microsatellite, morphology, reproductive isolation, speciation, sympatry, 1491

Cytochrome *b,* glacial refugia, Haida Gwaii, mammals, *Martes,* phylogeography, *Sorex,* 2008

Cytochrome oxidase I, dispersal, freshwater colonization, habitat transition, phylogeography, range expansion, salinity tolerance, 1423

Cytonuclear interactions, cytoplasmic DNA, nuclear-cytoplasmic interaction, 1734

Daphnia pulex, genetic architecture, life-history evolution, microsatellite loci, mitochondrial DNA, quantitative genetics, 100

Database, GenBank, geographic variation, mitochondrial DNA, 1961

Endangered species, isozymes, linkage disequilibrium, outcrossing, rarity, 91

Hybrid zone, hybridization, introgression, morphological variation, RAPDs, 1037

Mollusks

Animal phyla, Annelida, Arthropoda, Cambrian radiation, Cnidaria, invertebrate phylogeny, Mollusca, 319

Biogeography, *Campeloma,* mtDNA sequence variation, parthenogenesis, sexual reproduction, 1769

Body size, correlational selection, protandry, selective trade-offs, sexual selection, *Sphenarium purpurascens,* 209

Generative mechanisms, heterochrony, heterotopy, homology, Mollusca, ontogenetic trajectory, Patellogastropoda, relative warps analysis, 447

Morphology

Allometry, Araneae, body size, clutch size, comparative analysis, female reproductive output, life history, phylogeny, sexual dimorphism, spiders, 1987

Allometry, genitalia, sexual selection, 1624

Allometry, genitalia, sexual selection, statistical bias, 1621

California Channel Islands, discriminant function analysis, morphological change, morphometrics, *Peromyscus maniculatus,* temporal variation, 1573

Copulatory courtship, evolution of genitalia, geometric morphometrics, sexual selection, sperm precedence, 147

Coregonus, genetic differentiation, microsatellites, morphology, species flock, trophic ecology, 1857

Floral morphology, flowering phenology, *Heuchera,* insect visitation, plant-insect interactions, pollination, polyploidy, 1114

Geographic variation, hybrid zones, microsatellites, migration, migratory divide, mitochondrial DNA, morphology, orientation, 1925

Hybrid zone, hybridization, introgression, morphological variation, RAPDs, 1037

Insect flight, natural selection, phenotypic manipulation, pierid butterflies, survival analysis, wing size, 1479

Mosses

Bryophytes, liverworts, mosses, mutation, neutrality, selection, 1050

Mutations

Arabidopsis, canalization, genetic constraints, genetic covariance, mutation, pleiotropy, 1692

Bryophytes, liverworts, mosses, mutation, neutrality, selection, 1050

Deleterious alleles, inbreeding depression, purging, recessive mutations, selective interference, self-fertilization, size-specific mortality, 758
Deleterious mutation, fitness, mutation, mutation rate, mutational effect, 645
Deleterious mutations, genetic load, inbreeding depression, *Mimulus*, outcrossing, self-fertilization, 1678
Environmental stress, genetic load, *Saccharomyces cerevisiae*, spontaneous mutations, 1966
McDonald-Kreitman test, mildly deleterious mutation, neutrality index, Tajima's *D*, 1617

Parasitism
Allozyme heterozygosity, conservation biology, islands, parasitism, *Peromyscus maniculatus*, population density, 1318
Asobara tabida, competition, *Drosophila melanogaster*, feeding rate, *Leptopilina boulardi*, parasitoid, resistance, trade-offs, 1302
Asobara tabida, correlated responses, *Drosophila melanogaster*, encapsulation, Leptopilina, parasitoids, temperature, 966
Bombus terrestris, *Crithidia bombi*, horizontal transmission, host genotype, parasite fitness, Trypanosomatidae, 426
Brood parasitism, *Clamator glandarius*, coevolution, gene flow, host defense, *Pica pica*, 947
Brood parasitism, coevolution, gene flow, host-parasite interactions, migration, 269
Caryophyllaceae, coevolution, gene flow, host-parasite coevolution, local adaptation, *Ustilago*, 395
Cost of reproduction, egg limitation, life-history trade-offs, oviposition, parasitoids, sex allocation, 376
Cytochrome oxidase I and II, geographic structure, parasitoid-host interactions, phylogeography, population differentiation, 818
Echinostoma, local mate competition, parasite, phenotypic plasticity, sex allocation, simultaneous hermaphrodite, 1599
Genetic variation, inbreeding depression, microsatellite, parasite resistance, pathogen, survival, susceptibility, 1259
Malaria, *Plasmodium chabaudi*, transmission, virulence, 689
Parasite, parasite-mediated sexual selection, sexual selection, sexually transmitted disease, STD, virulence, 957

Phenotypic Plasticity
Abies procera, Douglas-fir, inbreeding depression, noble fir, photomorphogenic effects, *Pinus ponderosa*, ponderosa pine, *Pseudotsuga menziesii*, 417
Acacia greggii, *Cercidium floridum*, genetic correlation, heritability, parental investment, phenotypic plasticity, *Stator limbatus*, 552
Allocation, density-dependent character correlations, environmental heterogeneity, genetic correlations, phytochrome, red: far red, trade-offs, 1377
Annona cherimola, developmental stability, fluctuating asymmetry, heritability, heterozygosity, phenotypic quality, plant plasticity, 1396
Arabidopsis thaliana, flowering, natural selection, path analysis, phenotypic plasticity, reaction norm, 1704
Biogeography, hermaphrodite, outcrossing, phenotypic plasticity, phylogeny, *Rivulus marmoratus*, selfing, 1217
Bruchidae, geographic variation, life cycle, natural selection, phenotypic plasticity, reaction norm, 1979
Caste, character ordination, haplodiploidy, Hymenoptera, Vespidae, 225
Character size, chromosomal evolution, developmental stability, fluctuating asymmetry, house mouse, hybridization, Robertsonian fusion, 1268
Collared flycatcher, genetic benefit, genotype-by-environment interactions, heritability, natal environment, sexual selection, 1564
Combined stress, developmental stability, *Drosophila melanogaster*, extreme phenotypes, fluctuating asymmetry, heritability, phenotypic variability, 493
Density regulation, evolutionarily stable strategy, hard selection, polymorphism, reaction norm, soft selection, unpredictable environment, 1329
Developmental instability, environmental stress, fluctuating asymmetry, genomic coadaptation, heterozygosity, hybridization, *Salix*, 408
Developmental stability, directional asymmetry, fluctuating asymmetry, mate choice, size, weight, 527
Flour beetles, genotype-by-environment interaction, Haldane's rule, hybrid inviability, morphology, norms of reaction, speciation, temperature, *Tribolium*, 855
Fluctuating asymmetry, *Harmonia axyridis*, ladybird beetle, life-history traits, phenotypic engineering, plasticity, statistical selection, 1312

Phylogeny
Chrysoperla, Chrysopidae, evolution, homoplasy, insect, mtDNA, Neuroptera, phylogeny, songs, speciation, systematics, 1165
Crayfish, dispersal, *Orconectes*, phylogeny, vicariance biogeography, zoogeography, 123
Geographic variation, mtDNA, phylogeny, sexual selection, speciation, species concepts, 1884

Physiology
Aerobic capacity, evolutionary physiology, high altitude, *Peromyscus maniculatus*, selection, summit metabolism, thermogenic capacity, 1280

Plant-Insect Interaction
Adaptive plasticity, compensation, herbivory, induced defense, male plant fitness, overcompensation, plant-insect interactions, *Raphanus raphanistrum*, 1093
Agavaceae, breeding structure, correlated mating, mutualism, paternity analysis, *Tegeticula yuccasella*, *Yucca filamentosa*, yucca moth, 1293
Anholocycly, apomixis, covert sex, cryptic sex, myrmecophily, parthenogenesis, *Protrama*, 1458
Aphids, ecological specialization, habitat choice, insect-plant interactions, reproductive isolation, speciation, 1446
Bombus diversus, *Campanula punctata*, corolla width, male reproductive success, pollen fall, pollen removal, 752
Bottlenecks, Chrysomelidae, coalescence, historical demography, *Ophraella*, phylogeography, phytophagous insects, speciation, 1846
Coevolution, evolution of resistance, herbivore, parasitoid, pea aphid, population structure, tritrophic interactions, 1435
Cost of resistance, *Datura wrightii*, herbivory, polymorphism, selection, trichomes, 22
Floral morphology, flowering phenology, *Heuchera*, insect visitation, plant-insect interactions, pollination, polyploidy, 1114

Plants
Abies procera, Douglas-fir, inbreeding depression, noble fir, photomorphogenic effects, *Pinus ponderosa*, ponderosa pine, *Pseudotsuga menziesii*, 417
Acacia greggii, *Cercidium floridum*, genetic correlation, heritability, parental investment, phenotypic plasticity, *Stator limbatus*, 552
Adenophora grandiflora, allozymes, endemic species, genetic structure, protandry, spatial autocorrelation, 1068
Allocation costs, *Brassica rapa*, costs of resistance, ecological costs, herbivores, myrosinase, pollinators, 1105
Allozymes, aridity, chloroplast DNA, gene flow, hybridization, population structure, *Senecio*, 36
Allozymes, cpDNA, F_{ST}, introgression, mtDNA, *Pinus ponderosa*, population structure, 769
Annona cherimola, developmental stability, fluctuating asymmetry, heritability, heterozygosity, phenotypic quality, plant plasticity, 1396
Arabidopsis, canalization, genetic constraints, genetic covariance, mutation, pleiotropy, 1692
Arabidopsis thaliana, flowering, natural selection, path analysis, phenotypic plasticity, reaction norm, 1704
Arabis petraea, Bayesian methods, inbreeding depression, 1354
Arenaria, hybridization, mating system evolution, reproductive character displacement, self-pollination, 1723
Artificial selection, gender, pollen/ovule ratio, sex allocation, 717

Bryophytes, liverworts, mosses, mutation, neutrality, selection, 1050
Caryophyllaceae, coevolution, gene flow, host-parasite coevolution, local adaptation, *Ustilago*, 395
Character evolution, convergence, *Linanthus*, Polemoniaceae, self-incompatibility, selfing, 1387
Clarkia gracilis, gene silencing, phosphoglucose isomerase, polyploidy, 1060
Colonization, gene flow, plant population genetics, pollen dispersal, *Silene alba*, 63
Colonization, genetic differentiation, kin structure, migration, *Silene dioica*, 605
Colonization, gynodioecy, inbreeding depression, pollen limitation, *Silene vulgaris*, 745
Cost of resistance, *Datura wrightii*, herbivory, polymorphism, selection, trichomes, 22
cpDNA, hybridization, introgression, mtDNA, *Quercus*, species co-occurrence, white oaks, 1406
Deleterious mutations, genetic load, inbreeding depression, *Mimulus*, outcrossing, self-fertilization, 1678
Developmental instability, environmental stress, fluctuating asymmetry, genomic coadaptation, heterozygosity, hybridization, *Salix*, 408
Family structure, genetic relatedness, growth form, krummholz, subalpine, treeline, 74
Frequency-dependency, gynodioecy, pollen limitation, population structure, sex ratio, *Sidalcea*, 1714
Genetic conflict, population structure, sex ratio, *Silene alba*, 55
Herkogamy, inbreeding depression, *Ipomoea purpurea*, mating system, 1366
Paternity, pollen competition, sex ratio, *Silene*, 1028

Platyhelminthes

Echinostoma, local mate competition, parasite, phenotypic plasticity, sex allocation, simultaneous hermaphrodite, 1599

Polymorphism

Adaptive dynamics, ESS, evolutionary branching, frequency dependent selection, genetic polymorphism, Levene model, soft selection, 993
Adh, α*Gpdh*, density-dependent mortality, *Drosophila melanogaster*, genotype-by-environment interaction, inversions, Levene's model, natural population, protected polymorphism, 175
Ambystoma barbouri, background matching, gene flow, local adaptation, pigment polymorphism, predation, 889
Crickets, *Gryllus firmus*, JH, JHE, juvenile hormone, juvenile hormone esterase, wing polymorphism, 837
Drosophila quinaria, genetic arms race, population genetics, segregation distortion, selfish genes, X-chromosome polymorphism, Y-chromosome polymorphism, 164
Genetic correlation, heritability, juvenile hormone, juvenile hormone esterase, liability, threshold model, wing polymorphism, 973
Genetic correlation, insect, juvenile hormone, quantitative genetics, wing dimorphism, 977

Population Biology

Effective population size, habitat quality, inbreeding coefficient, interdemic model, island model, metapopulation, 1

Population Structure

Acanthaster, allozymes, crown-of-thorns, echinoderms, gene flow, Indo-Pacific, marine, population genetics, speciation, 1782
Adenophora grandiflora, allozymes, endemic species, genetic structure, protandry, spatial autocorrelation, 1068
Allorecognition, genetic polymorphism, *Hydractinia symbiolongicarpus*, Hydrozoa, population structure, RAPDs, 793
Allozyme, billfish, blue marlin, comparative molecular evolution, genetic drift, Istiophoridae, *Makaira nigricans*, mitochondrial DNA, population genetics, single-copy nuclear DNA, 568
Allozymes, aridity, chloroplast DNA, gene flow, hybridization, population structure, *Senecio*, 36
Allozymes, cpDNA, F_{ST}, introgression, mtDNA, *Pinus ponderosa*, population structure, 769
Alvinellid polychaetes, deep-sea hydrothermal vents, dispersal, gene flow, metapopulation, simulations, 1128
Ambystoma barbouri, background matching, gene flow, local adaptation, pigment polymorphism, predation, 889
AMOVA, *Dendroica*, geographic variation, mtDNA, phylogeography, population differentiation, 1915
Assortative mating, clinal hybrid zone, gene flow, mosaic hybrid zone, reinforcement, stepping-stone model, 1343
Atlantic salmon, genetic differentiation, microsatellites, scale samples, temporal variation, 261
Bathymetric clines, benthic, body size, deep sea, gastropods, 1298
Biogeography, cytochrome oxidase, gene flow, islands, mitochondrial DNA, ocean currents, sea urchins, 806
Bottleneck, control region, mitochondrial DNA, ND1, *Nyctalus noctula*, Pleistocene, population structure, 1247
Caryophyllaceae, coevolution, gene flow, host-parasite coevolution, local adaptation, *Ustilago*, 395
Chiroptera, gene flow, microsatellites, mitochondrial DNA, population structure, 1582
Coevolution, evolution of resistance, herbivore, parasitoid, pea aphid, population structure, tritrophic interactions, 1435
Colonization, gene flow, plant population genetics, pollen dispersal, *Silene alba*, 63
Colonization, genetic differentiation, kin structure, migration, *Silene dioica*, 605
Copepod, diapause, fluctuating selection, microevolution, migration, overlapping generations, selection response, 111
Correlations, *Crotaphytus collaris*, F-statistics, gene flow, genetic distance, Mantel's test, population structure, random genetic drift, 1898
Cytochrome *b*, glacial refugia, Queen Charlotte Islands, *Ursus americanus*, 2013
Cytochrome oxidase I and II, geographic structure, parasitoid-host interactions, phylogeography, population differentiation, 818
Database, GenBank, geographic variation, mitochondrial DNA, 1961
Effective population size, habitat quality, inbreeding coefficient, interdemic model, island model, metapopulation, 1
Elaphe obsoleta, gene flow, hibernacula, microsatellites, population structure, snakes, 1995
Family structure, genetic relatedness, growth form, krummholz, subalpine, treeline, 74
Frequency-dependency, gynodioecy, pollen limitation, population structure, sex ratio, *Sidalcea*, 1714
Functional estimation, gene-flow patterns, pollen dispersal, spatial sampling, 2005
Genetic conflict, population structure, sex ratio, *Silene alba*, 55
Geographic invariance, infinite-alleles model, infinite-sites model, population differentiation, population structure, 664
Geographic variation, mtDNA, phylogeny, sexual selection, speciation, species concepts, 1884

Predation

Ambystoma barbouri, background matching, gene flow, local adaptation, pigment polymorphism, predation, 889

Protists

Malaria, *Plasmodium chabaudi*, transmission, virulence, 689

Quantitative Genetics

Acacia greggii, *Cercidium floridum*, genetic correlation, heritability, parental investment, phenotypic plasticity, *Stator limbatus*, 552
Additive genetic variance, epistasis, founder-effect speciation, mice, population bottlenecks, 1009
Arabidopsis, canalization, genetic constraints, genetic covariance, mutation, pleiotropy, 1692
Asobara tabida, correlated responses, *Drosophila melanogaster*, encapsulation, Leptopilina, parasitoids, temperature, 966
Bactrocera cucurbitae, circadian rhythm, genetic correlation, mating behavior, reproductive isolation, speciation, 201
Body size, correlational selection, protandry, selective trade-offs, sexual selection, *Sphenarium purpurascens*, 209

Bootstrap, Columbiformes, developmental control genes, Fringillidae, *Hox* genes, Mantel's test, morphometrics, phenotypic correlation matrices, skeletal measurements, 899
Combined stress, developmental stability, *Drosophila melanogaster*, extreme phenotypes, fluctuating asymmetry, heritability, phenotypic variability, 493
Computer simulation, fitness, natural selection, selection differentials, selection gradients, sexual selection, viability selection, 286
Condition, egg size, *Ficedula hypoleuca*, heritability, life-history traits, maternal effects, ontogeny, 279
Copepod, fitness, quantitative genetics, speciation, *Tigriopus californicus*, 1757
Correlated characters, genetic covariances, selection gradients, self-fertilization, 350
Crickets, genetic correlation, *Gryllus*, heritability, sexual selection, 848
Daphnia pulex, genetic architecture, life-history evolution, microsatellite loci, mitochondrial DNA, quantitative genetics, 100
Development, diffusion–threshold model, dominance, epistasis, fluctuating asymmetry, heritability, quantitative genetics, 358
Directional dominance, dominance variance, inbreeding depression, 1288
Evolutionary trajectory, genetic constraints, genetic correlation, genetic covariance, multivariate evolution, quantitative genetics, 1592
Flour beetles, genotype-by-environment interaction, Haldane's rule, hybrid inviability, morphology, norms of reaction, speciation, temperature, *Tribolium*, 855
Flury hierarchy, genetic correlation, matrix comparisons, principal components analysis, quantitative genetics, randomization test, statistical resampling, 1506
Flury hierarchy, genetic correlation, matrix comparisons, quantitative genetics, snakes, 1516
Genetic correlation, genetic covariance, genetic variance, heritability, quantitative genetics, 216
Genetic correlation, heritability, juvenile hormone, juvenile hormone esterase, liability, threshold model, wing polymorphism, 973
Genetic correlation, insect, juvenile hormone, quantitative genetics, wing dimorphism, 977
Quantitative genetics, selection response, self-fertilization, 336

Reproduction—Animal
Age, cooperative breeding, DNA fingerprinting, extrapair paternity, *Malurus cyaneus*, molt, sexual selection, 938
Bactrocera cucurbitae, circadian rhythm, genetic correlation, mating behavior, reproductive isolation, speciation, 201
Cost of reproduction, egg limitation, life-history trade-offs, oviposition, parasitoids, sex allocation, 376
Cryptic female choice, reproduction, sexual selection, sperm, sperm competition, spermatheca, vestigial, 1804

Reproduction—Plant
Agavaceae, breeding structure, correlated mating, mutualism, paternity analysis, *Tegeticula yuccasella*, *Yucca filamentosa*, yucca moth, 1293
Allocation costs, *Brassica rapa*, costs of resistance, ecological costs, herbivores, myrosinase, pollinators, 1105
Angiosperm phylogeny, dispersal, growth form, key innovations, pollination, species diversity, trait evolution, 732
Arenaria, hybridization, mating system evolution, reproductive character displacement, self-pollination, 1723
Asexuality, clonal reproduction, mutation, plant reproductive strategies, sexuality, swamp loosestrife, trait loss, 1079
Bombus diversus, *Campanula punctata*, corolla width, male reproductive success, pollen fall, pollen removal, 752
Colonization, gynodioecy, inbreeding depression, pollen limitation, *Silene vulgaris*, 745
Dispersal experiments, functional estimation, gene-flow patterns, pollen dispersal, 2002
Floral morphology, flowering phenology, *Heuchera*, insect visitation, plant-insect interactions, pollination, polyploidy, 1114
Frequency-dependency, gynodioecy, pollen limitation, population structure, sex ratio, *Sidalcea*, 1714
Functional estimation, gene-flow patterns, pollen dispersal, spatial sampling, 2005
Herkogamy, inbreeding depression, *Ipomoea purpurea*, mating system, 1366
Paternity, pollen competition, sex ratio, *Silene*, 1028

Reptiles
Coevolution, garter snake, preadaptation, predator-prey, resistance, tetrodotoxin, 1528
Coevolution, garter snake, resistance, tetrodotoxin, toxicity, 626
Elaphe obsoleta, gene flow, hibernacula, microsatellites, population structure, snakes, 1995
Flury hierarchy, genetic correlation, matrix comparisons, quantitative genetics, snakes, 1516

Resistance
Adaptive plasticity, compensation, herbivory, induced defense, male plant fitness, overcompensation, plant-insect interactions, *Raphanus raphanistrum*, 1093
Allocation costs, *Brassica rapa*, costs of resistance, ecological costs, herbivores, myrosinase, pollinators, 1105
Asobara tabida, competition, *Drosophila melanogaster*, feeding rate, *Leptopilina boulardi*, parasitoid, resistance, trade-offs, 1302
Bacteria, cost of resistance, epistasis, resistance, viruses, 292
Coevolution, garter snake, preadaptation, predator-prey, resistance, tetrodotoxin, 1528
Colicin resistance, colicins, fitness effects, pleiotropy, 1019
Cost of resistance, *Datura wrightii*, herbivory, polymorphism, selection, trichomes, 22
Disease, pathogenicity, recombination, red queen hypothesis, resistance, virulence, 704
Genetic variation, inbreeding depression, microsatellite, parasite resistance, pathogen, survival, susceptibility, 1259

Selection—Artificial
Artificial selection, gender, pollen/ovule ratio, sex allocation, 717
Copepod, diapause, fluctuating selection, microevolution, migration, overlapping generations, selection response, 111

Selection—Experimental
Acclimation, *Drosophila*, experimental evolution, heat-shock proteins, Hsp70, thermotolerance, 484
Drosophila, experimental science, genetic transilience, speciation, 1628
Drosophila simulans, experimental populations, meiotic drive, sex-ratio distortion, 506

Selection—Natural
Adaptive dynamics, ESS, evolutionary branching, frequency dependent selection, genetic polymorphism, Levene model, soft selection, 993
Adh, α*Gpdh*, density-dependent mortality, *Drosophila melanogaster*, genotype-by-environment interaction, inversions, Levene's model, natural population, protected polymorphism, 175
Aerobic capacity, evolutionary physiology, high altitude, *Peromyscus maniculatus*, selection, summit metabolism, thermogenic capacity, 1280
Alcohol dehydrogenase, frequency-dependent selection, olive fruit fly, 518
Allele frequencies, linkage disequilibrium, phenotypic model, selection, 600
Amphibia, hybrid zone, natural selection, reproductive isolation, speciation, 1611
Amphibian, endogenous selection, exogenous selection, fitness components, hybridization, larvae, *Rana*, 1872
Angiosperm phylogeny, dispersal, growth form, key innovations, pollination, species diversity, trait evolution, 732
Arabidopsis thaliana, flowering, natural selection, path analysis, phenotypic plasticity, reaction norm, 1704
Balancing selection, habitat variation, *Mpi*, multiple locus comparisons, *Semibalanus balanoides*, 135
Biogeography, *Drosophila*, mtDNA, ND5, phylogeny, rainforest, selection, 1306

Bruchidae, geographic variation, life cycle, natural selection, phenotypic plasticity, reaction norm, 1979
Bryophytes, liverworts, mosses, mutation, neutrality, selection, 1050
Chrysomelidae, host shifts, inbreeding, *Ophraella*, phytophagous insects, shifting balance theory, variance-induced peak shifts, 561
Computer simulation, fitness, natural selection, selection differentials, selection gradients, sexual selection, viability selection, 286
Darwins, evolutionary rates, haldanes, microevolution, population divergence, rapid evolution, 1637
Density regulation, evolutionarily stable strategy, hard selection, polymorphism, reaction norm, soft selection, unpredictable environment, 1329
Disease, pathogenicity, recombination, red queen hypothesis, resistance, virulence, 704
Drosophila melanogaster, inbreeding, peak shifts, phenotypic variance, wing traits, 1143
Energetics, exercise, integrative biology, lizard, locomotion, optimality, physiology, 580
Insect flight, natural selection, phenotypic manipulation, pierid butterflies, survival analysis, wing size, 1479

SELECTION—SEXUAL
Age, cooperative breeding, DNA fingerprinting, extrapair paternity, *Malurus cyaneus*, molt, sexual selection, 938
Allometry, genitalia, sexual selection, 1624
Allometry, genitalia, sexual selection, statistical bias, 1621
Ants, assortative mating, body size and shape, *Pogonomyrmex*, sexual selection, 535
Auditory sensitivity, courtship role-reversal, mate-feeding, sexual selection, Tettigoniidae, 546
Body size, correlational selection, protandry, selective trade-offs, sexual selection, *Sphenarium purpurascens*, 209
Chase-away, evolutionary conflict, interlocus contest evolution, intersexual coevolution, sexual selection, 302
Chase-away, noise, reliable signaling, sexual selection, 299
Collared flycatcher, genetic benefit, genotype-by-environment interactions, heritability, natal environment, sexual selection, 1564
Competition, female choice, *Gryllus bimaculatus*, heritability, mating, sexual selection, trade-off, 620
Computer simulation, fitness, natural selection, selection differentials, selection gradients, sexual selection, viability selection, 286
Copulatory courtship, evolution of genitalia, geometric morphometrics, sexual selection, sperm precedence, 147
Crickets, genetic correlation, *Gryllus*, heritability, sexual selection, 848
Cryptic female choice, reproduction, sexual selection, sperm, sperm competition, spermatheca, vestigial, 1804
Developmental instability, *Forficula auricularia*, sexual selection, 157
Developmental stability, directional asymmetry, fluctuating asymmetry, mate choice, size, weight, 527
Female preference, interlocus contest evolution (ICE), mate choice, motivation, preexisting bias, sexual selection, 296
Ficedula hypoleuca, mate choice, pied flycatcher, plumage color, population divergence, secondary sexual characters, sexual selection, signals, speciation, 1235
Gasterosteus, hybrid fitness, mating discrimination, reproductive isolation, sexual selection, speciation, 874
Hybrid zones, marine fishes, mate choice, mitochondrial control-region, 247
Mate choice, olfactory cues, phylogeny, swordtail fishes, *Xiphophorus*, 880
Parasite, parasite-mediated sexual selection, sexual selection, sexually transmitted disease, STD, virulence, 957

SENESCENCE
Aging, habitat duration, life history, reproductive value, senescence, trade-off, 1744

SEX
Anholocycly, apomixis, covert sex, cryptic sex, myrmecophily, parthenogenesis, *Protrama*, 1458
Artificial selection, gender, pollen/ovule ratio, sex allocation, 717
Asexuality, clonal reproduction, mutation, plant reproductive strategies, sexuality, swamp loosestrife, trait loss, 1079
Cost of reproduction, egg limitation, life-history trade-offs, oviposition, parasitoids, sex allocation, 376
Echinostoma, local mate competition, parasite, phenotypic plasticity, sex allocation, simultaneous hermaphrodite, 1599
Parasite, parasite-mediated sexual selection, sexual selection, sexually transmitted disease, STD, virulence, 957

SEX RATIO
Ants, *Pheidole*, queen-worker conflict, sex ratio, 1470
Drosophila simulans, experimental populations, meiotic drive, sex-ratio distortion, 506
Frequency-dependency, gynodioecy, pollen limitation, population structure, sex ratio, *Sidalcea*, 1714
Genetic conflict, population structure, sex ratio, *Silene alba*, 55
Paternity, pollen competition, sex ratio, *Silene*, 1028

SPECIATION
Acanthaster, allozymes, crown-of-thorns, echinoderms, gene flow, Indo-Pacific, marine, population genetics, speciation, 1782
Adaptive dynamics, ESS, evolutionary branching, frequency dependent selection, genetic polymorphism, Levene model, soft selection, 993
Adaptive radiation, adaptive zone, contingency, diversification, eyes, key innovation, sister-group tests, 1654
Adaptive radiation, *Anolis*, disparity, diversity, lizard, PCA, *Sceloporus*, 1226
Adaptive radiation, Bonin Islands, island biology, land snails, *Mandarina*, molecular evolution, mtDNA, 460
Adaptive radiation, hybrid fitness, natural selection, reproductive isolation, speciation, stickleback, 866
Additive genetic variance, epistasis, founder-effect speciation, mice, population bottlenecks, 1009
Allozymes, apple maggot fly, directional selection, fruit rot, host races, negative genetic fitness trade-offs, sympatric speciation, 187
Amphibia, hybrid zone, natural selection, reproductive isolation, speciation, 1611
Aphids, ecological specialization, habitat choice, insect-plant interactions, reproductive isolation, speciation, 1446
Arctic, biogeography, *Daphnia*, glacial refugia, long-distance dispersal, mtDNA RFLPs, phylogeography, vicariance, 777
Arctonoe, free-spawning, gamete compatibility, gamete interactions, polychaetes, reproductive isolation, speciation, 435
Auklet, phylogeny, polytomy, sample size, speciation, statistical power analysis, 932
Bactrocera cucurbitae, circadian rhythm, genetic correlation, mating behavior, reproductive isolation, speciation, 201
Behavioral isolation, cytoplasmic incompatibility, *Drosophila*, gene flow, Haldane's rule, mtDNA, nucleotide diversity, reproductive isolation, speciation, *Wolbachia*, 1157
Biogeographic, centrifugal speciation, East Indies, evolutionary center, marine tropics, 326
Bottleneck, *Drosophila*, founder-flush, genetic transilience, speciation, 1632
Chrysoperla, Chrysopidae, evolution, homoplasy, insect, mtDNA, Neuroptera, phylogeny, songs, speciation, systematics, 1165
Copepod, fitness, quantitative genetics, speciation, *Tigriopus californicus*, 1757
Coregonus, ecotypes, *Gasterosteus*, microsatellite, morphology, reproductive isolation, speciation, sympatry, 1491
Coregonus, genetic differentiation, microsatellites, morphology, species flock, trophic ecology, 1857
Drosophila, experimental science, genetic transilience, speciation, 1628
Drosophila serrata, evolutionary hypotheses, field heritability, genetic variation, species borders, stress resistance, 1823

Ficedula hypoleuca, mate choice, pied flycatcher, plumage color, population divergence, secondary sexual characters, sexual selection, signals, speciation, 1235
Flour beetles, genotype-by-environment interaction, Haldane's rule, hybrid inviability, morphology, norms of reaction, speciation, temperature, *Tribolium*, 855
Gasterosteus, hybrid fitness, mating discrimination, reproductive isolation, sexual selection, speciation, 874
Geographic variation, mtDNA, phylogeny, sexual selection, speciation, species concepts, 1884

SPONGES/PORIFERA
Allozymes, *Chondrilla*, cosmopolitanism, endemism, population structure, taxonomy, 1414

SYSTEMATICS
Acari, arrhenotoky, genetic systems, haplodiploidy, molecular systematics, phylogenetics, pseudoarrhenotoky, 1796
Adaptive radiation, adaptive zone, contingency, diversification, eyes, key innovation, sister-group tests, 1654
Adaptive radiation, *Anolis*, disparity, diversity, lizard, PCA, *Sceloporus*, 1226
Adaptive radiation, Bonin Islands, island biology, land snails, *Mandarina*, molecular evolution, mtDNA, 460
Adaptive radiation, control region, Darwin's finches, *Geospiza*, hybridization, ITS 1, phylogeny, 1553
Allozymes, *Chondrilla*, cosmopolitanism, endemism, population structure, taxonomy, 1414
Angiosperm phylogeny, dispersal, growth form, key innovations, pollination, species diversity, trait evolution, 732
Animal phyla, Annelida, Arthropoda, Cambrian radiation, Cnidaria, invertebrate phylogeny, Mollusca, 319
Aphidiinae, asexual, elongation factor, *Lysiphlebus*, mitochondrial DNA, parthenogenesis, phylogeny, thelytoky, 1189
Biogeography, *Drosophila*, mtDNA, ND5, phylogeny, rainforest, selection, 1306
Chrysoperla, Chrysopidae, evolution, homoplasy, insect, mtDNA, Neuroptera, phylogeny, songs, speciation, systematics, 1165
Crayfish, dispersal, *Orconectes*, phylogeny, vicariance biogeography, zoogeography, 123
Fishes, genus *Gila*, geologic history, hydrography, Mantel test, vicariance, western North America, 238
Mate choice, olfactory cues, phylogeny, swordtail fishes, *Xiphophorus*, 880

VARIATION
Drosophila serrata, evolutionary hypotheses, field heritability, genetic variation, species borders, stress resistance, 1823

ZOOPLANKTON
Arctic, biogeography, *Daphnia*, glacial refugia, long-distance dispersal, mtDNA RFLPs, phylogeography, vicariance, 777
Coadaptation, copepod, cytochrome *c* oxidase, enzyme activity, introgression, nuclear-cytoplasmic interactions, *Tigriopus californicus*, 1972
Copepod, diapause, fluctuating selection, microevolution, migration, overlapping generations, selection response, 111
Copepod, fitness, quantitative genetics, speciation, *Tigriopus californicus*, 1757
Daphnia pulex, genetic architecture, life-history evolution, microsatellite loci, mitochondrial DNA, quantitative genetics, 100
